Connecting to the ZTE:

You will connect your wireless device to the ZTE the same way you would to any wireless router.

- On your device, go to "Settings" and locate "WiFi"
- Select the network name listed in your ZTE Kit (PECLIB_Mobile_#)
- A window to type in a password should appear. Type in the password indicated in your ZTE Kit (L****#I*****#). Passwords are all case sensitive.
- Once connected, you should also see a number on the Wifi symbol on the screen of the ZTE to indicate number of connected devices
- You can now use the internet from your mobile device or computer

Charging the ZTE

- Plug the USB end of the power cable into the wall block and plug the wall block into a power outlet
- Plug the small end of the power cable into the power port on the ZTE. The device will then begin charging.

Care of the ZTE

- Do not get the ZTE wet. If it gets smudged, you can use a dry soft cloth to wipe it down.
- Do not tamper with SIM card or reset buttons
- Device should not be left in direct sunlight, or it may overheat
- Contact the Technology Resource Centre with any further care questions
